CURRICULUM VITAE

Szymon Berski

Senior Full-Stack Engineer · Laravel / TypeScript / Vue / Astro · AI-assisted development

15+ years building websites, e-commerce platforms and web applications for clients in Poland and abroad. Laravel + Astro + TypeScript as the core stack; I own the system end-to-end – architecture, implementation, testing, deployment and support – with AI agents wired into the engineering workflow.

Work Experience

02.2021 → present · 5 yrs 9 mos

Senior Full-Stack Engineer · B2B contract · Remote · Ustroń

Rocksoft · software house · PL & international clients

- End-to-end delivery of web platforms and e-commerce systems – architecture, implementation, testing, deployment and maintenance – in international, distributed teams working in English (EasyTruck.shop for a US client: a running product taken over in 2024 and carried for two years with one other developer – invoicing, AI reading of scanned orders and invoices through OpenAI into pre-filled forms, QuickBooks sync, push notifications, search – alongside daily features and fixes; PHPUnit and Playwright suites. The front-end of a Norwegian online store for trolleys, carts and lifting equipment, on Magento).
- Nearly four years (2020–2024) on the horze.de storefront on Salesforce Commerce Cloud, a large European equestrian retailer: Page Designer components and responsive UI built from Figma designs, Black Friday and seasonal campaigns, SEO changes with an external agency, cross-device testing on BrowserStack.
- Laravel + Filament backends and Astro/Vue front-ends, including Diligently.pl, Rocksoft's own product: a multi-company headless CMS (lead author) that publishes a fleet of client sites as static Astro builds; PHPUnit and Playwright suites and CI/CD in every delivery I own.
- Agent orchestration on Claude Code and Codex: parallel agents in separate git worktrees, run and watched in Herdr; co-author of an internal cockpit built on the open-source Cezar that takes agent teams from issue to draft PR; agents wired into the CMS panel over MCP.
- Code audits and AI-powered product development for clients: reviewing codebases for architecture, security and maintainability, and taking AI-built prototypes to production.

Laravel · Filament · Astro · Vue · TypeScript · Node.js · SFCC · WordPress (headless) · Magento · MCP · PHPUnit · Playwright · BrowserStack · Cloudflare · Figma · Claude Design

06.2020 → present · 6 yrs 5 mos

Full-Stack Developer · Self-Employed · Remote · Bielsko-Biała

spoko.space · direct clients & own products

- Websites, online stores and web applications for direct clients – from the brief through design, build, testing and deployment to support after launch – mostly Astro and Laravel. Deployment and upkeep are mine too: static fronts on Cloudflare, Laravel backends on VPS or shared hosting, with deploys and backups.
- Own products shipped end-to-end: the polo.blue family (parts catalogue, owner's manual and blog for the VW Polo 6R), Garazyn (garage inventory on Laravel + Filament) Uper SEO

Auditor, a Chrome extension for SEO pros and developers on the Chrome Web Store, and ZapiszPrzepis, a PWA that saves recipes shared from social media (Next.js + Supabase + Inngest on Cloudflare).

- Own headless CMS with AI: Laravel + Filament panel, block-based page builder, translations and media, every site published as a static Astro build, AI wired in over MCP.
- Own products built with agents: Claude Code and Codex in parallel, each in its own git worktree, watched in Herdr; I plan, decide and review, the agents write the code.
- Open source on GitHub: filament-ops-notify, a Filament plugin that sends inquiries, errors and builds from the panel to the admin on Telegram; Spoko Design System (Vue 3 + UnoCSS, on npm); Enhanced WP REST API (headless WordPress); spoko labels (label printing over Web Bluetooth).
- WCAG 2.2 AA accessibility audits and code audits of existing projects; this site passes the same gate on every build.

Astro · Laravel · Filament · Vue · TypeScript · React · UnoCSS · Cloudflare · WordPress · Chrome extensions · Meilisearch · Playwright · axe

06.2020 → 02.2021 · 8 mos

Front-end Developer · B2B contract · Remote

Tantis.pl · KFI sp. z o.o. · online bookstore

- Rewrote the admin dashboard of an online bookstore in Vue (Bootstrap-Vue, TypeScript).
- Storefront on jQuery + Symfony (Twig): promotional landing pages, product-page tabs and thumbnails; production errors monitored in Sentry.

Vue · TypeScript · Bootstrap-Vue · Symfony · Twig · jQuery · Sentry

12.2017 → 05.2020 · 2 yrs 5 mos

Front-end Developer · Bielsko-Biała

Lizard Media · UX & software house

- Store front-ends built to Adobe XD designs with the UX team: Tous (Magento 2, Polish and Czech versions, promotional landing pages), Martes Sport (PrestaShop: cart, delivery and payment changes, A/B-tested product card and listing, mode360 and Paczkomaty integrations), Krosno (PrestaShop rebranding and SEO fixes) and Montersi (PrestaShop 1.7: faceted navigation, cart, customer panel, invoices, Orbitvu 360).
- Corporate sites and landing pages: Aluprof (a large PyroCMS + Vue site – layout, RWD, translations, FreshMail newsletter templates), a multilingual WordPress profile site for Grupa Kęty with an admin tailored to the client, CITS Krosno (multilingual WordPress) and the rebranding of the agency's site lizardmedia.pl.
- Implementing third-party SEO audits in existing stores and sites.
- Workflow and standards of a large software house: Git, Gulp and Webpack builds, Jira and Kanban, Confluence, technical documentation, cross-device testing on physical iOS devices and BrowserStack.

PrestaShop · Magento 2 · WordPress · PyroCMS · Vue · Webpack · Gulp · Adobe XD · BrowserStack

02.2015 → 12.2017 · 2 yrs 10 mos

Front-end Developer · SEO Specialist · Bielsko-Biała

AQIMO.pl · later NO-LIMIT.pl · web agency

- Websites, portals and applications for companies – from template design through deployment: the SHE swimwear and Pilguni children's clothing storefronts on a custom Phalcon backend, Marbet Style, and the SkinLaser aesthetic-medicine clinic site with its Google Ads landing pages.

- HoReCa, the largest share of the work: sites for hotels, spa and health-resort properties – Orle Gniazdo in Szczyrk, Bukowy Park in Polanica-Zdrój, Pałac Wojanów in the Karkonosze – room, package and offer subpages, galleries, online booking engine integration, responsive layouts.
- SEO Specialist at SEOBB.pl, the agency's SEO brand: client site audits and optimisation, content commissioned from copywriters, link building; built the brand's site too.

PHP · HTML · CSS · JavaScript · jQuery · WordPress · Phalcon · SEO

07.2011 → 05.2012 · 10 mos

Technical worker · Bielsko-Biała

SETIA.pl

Care of client sites and supporting SEO sites (PBN) on Joomla, WordPress and Drupal: content and template changes, updates, microsites for SEO campaigns.

Joomla · WordPress · Drupal · HTML · CSS · SEO

Selected Projects

Highlights

Custom CMS with AI
Lead author of a multi-company headless CMS behind a fleet of client sites: Laravel + Filament panel, block-based page builder, translations, media, menus and redirects, every site published as a static Astro build. An MCP layer exposes the same content to AI tooling under the same permissions as the panel.

EasyTruck.shop
Heavy-duty truck shop management platform for a US client (Laravel + Inertia/Vue) – service work orders, parts inventory, invoicing and team operations, from customer intake to billing. Taken over as a running product in 2024 and carried for two years with one other Rocksoft developer, in the client's distributed team: the invoicing module with estimates and discounts, AI reading of scanned vendor orders and invoices through OpenAI into pre-filled orders with matched parts, QuickBooks Online sync, push notifications, Typesense search on Scout, QR and barcode scanning, service inspections – next to the daily stream of features, bug fixes and performance clean-ups, with PHPUnit and Playwright suites as the safety net.

Garazyn
Designed and built solo: a private inventory system for parts and tools in a home garage. Laravel 13 + Filament 5, QR workflows (multi-scan), labels printed straight from the panel over Web Bluetooth through spoko labels, REST API, AI integrations (Gemini, DeepL), PHPUnit + Playwright.

E-commerce

horze.de – Storefront front-end for an international online store on Salesforce Commerce Cloud (VanillaJS, jQuery, SCSS), built from Figma designs in an international, distributed team.

tantis.pl – Admin dashboard rewritten in Vue (Bootstrap-Vue, TypeScript) for an online bookstore, plus storefront work on the jQuery + Symfony (Twig) shop: promotional landing pages, product-page tabs and thumbnails, Sentry-reported front-end fixes.

montersi.pl – PrestaShop 1.7 storefront built to design with a UX designer: rebuilt faceted navigation, cart, customer panel and invoices; Orbitvu 360 integration.

sklepmartes.pl – PrestaShop 1.5 store: custom cart, delivery and payment changes, product card and listing updates from A/B tests, mode360.eu and Paczkomaty integrations.

touspolska.pl – Magento 2 jewellery store: layout changes and promotional landing pages for the Polish and Czech versions, tested on physical iOS devices and BrowserStack.

`she.pl` – Storefront front-end for SHE swimwear on a custom Phalcon backend; PBN management for the client's SEO.

`pilguni.com` – Storefront front-end for a children's winter clothing store (Phalcon).

`krosno.com` – Site rebranding and SEO-driven fixes to the PrestaShop 1.5 store.

SEO · WordPress · Marketing

`profile.grupakety.com` – Multilingual WordPress site built to design, with an admin panel tailored to the client.

`lizardmedia.pl` – Rebranding build on WordPress: custom fields and templates, CTA banners, hardening, English-ready.

`skin-laser.pl` – Aesthetic medicine clinic site and Google Ads landing pages.

`aluprof.eu` – Layout, RWD and translation work on a large PyroCMS + Vue site; FreshMail newsletter templates.

Astro · Headless

`catalog.polo.blue` – Own system: parts and accessories catalog for the VW Polo 6R – Astro SSG front-end, Laravel + Filament admin, AI descriptions, DeepL translations, Cloudflare R2 image pipeline, Meilisearch.

`polo6r.pl` – Own system: virtual owner's manual for the VW Polo 6R – Astro PWA with dark mode and search, plus a Vue 3 PR-code decoder backed by a Laravel API.

`polo.blue` – Car parts blog – statically generated Astro front-end on a headless WordPress REST API.

`gotowysms.pl` – Own product: ready-made SMS and greeting texts as a static Astro site fed by a Laravel 13 + Filament CMS, built to ride out seasonal traffic spikes.

Open source · Tools

`Spoko Design System` – Open-source Vue 3 component library with UnoCSS styles, published on npm with Astro-based docs; the polo.blue catalogue and blog run on it.

`Enhanced WP REST API` – Open-source WordPress plugin for headless setups: Polylang translations, GA4, hreflang and a headless mode over the REST API.

`filament-ops-notify` – Open-source Filament plugin: inquiries, errors and builds from the panel reach the admin on Telegram, with no changes to existing code.

`spoko labels` – Open-source toolkit that prints warehouse labels straight from the panel over Web Bluetooth – one button instead of an export and a phone app.

`uper.pl` – Uper SEO Auditor – own Chrome extension for SEO pros and devs: real-time Core Web Vitals, schema.org debugging, GTM verification, JS errors in a side panel. On the Chrome Web Store.

`ZapiszPrzepis` – Own product, open source: a PWA that saves recipes shared from social media – share a link, get a permanent Polish copy of the recipe, offline too. Next.js 16, Supabase (auth, Postgres, storage), background jobs on Inngest, AI scraping with Firecrawl, on Cloudflare Workers.

`Online PDF Editor` – Free, privacy-first PDF editor in the browser – Python, Flask and PyMuPDF on Google Cloud Run.

`SEO Monitoring Dashboard` – Backlinks, positions, index status and Core Web Vitals for my own sites on free Google APIs – Laravel + Filament, with alerts.

`SpokoMeter` – Digital car gauge on ESP32 with an Android companion app – Kotlin and C++, built with AI agents.
